

How you can deactivate cookies

It is possible to modify the browser in order to deactivate the cookies throughout a simple procedure.

Firefox:

1. Open Firefox
2. Push the button "Alt" on the keyboard
3. On the instruments bar which is placed in the top part of the browser, select "Instruments" and then "options"
4. Then, select the board "Privacy"
5. Go to "Chronology settings" and then on "Use personalized settings". Clear "Accept cookies from websites" and save the preferences

Internet Explorer:

1. Open Internet Explorer
2. Click on the button "Instruments" and then "Internet options"
3. Select the board "Privacy" and move the slider on the level of privacy that you want to set up (to the top if you want to block all the cookies or to the bottom if you want to accept each one of them)
4. Then, click on OK

Google Chrome:

1. Open Google Chrome
2. Click on the icon "Instruments"
3. Select "Settings" and afterwards "Advanced settings"
4. Select "Content settings" on the item "Privacy"
5. On the board "Cookies" it is possible to deactivate the cookies and to save the preferences

Safari:

1. Open Safari
2. Choose "Preferences" on the instrument bar, then select the panel "Assurance" on the following dialogue window
3. In the section "Accept cookies" it is possible to specify if and when Safari has to save the cookies from the websites. For further information click on the Help button (which is labelled with a question mark)
4. For further information on the cookies that are memorized on your computer, click on "Show cookies"
5. On the board "Cookies" it is possible to clear the cookies and save the preferences.
